И МНОГОЕ ДРУГОЕ

От существующих сегодня на рынке элементов отделки, наши изделия отличает легкий вес, не утяжеляющий вес конструкции в целом, гибкость, позволяющую использовать элементы даже на неровной поверхности. Использование покрытий сложного химического состава гарантируют полную влагонепроницаемость и долговечность наших изделий при использовании на открытом воздухе. Легкий вес позволяет отказаться от применения специальной подъемной строительной техники. Так же нет необходимости в дополнительной доработке после установки.
